

Recommendation letter for Márk Mátrai

I am pleased to write this letter of **recommendation for Márk Mátrai**, who worked at xfb Analytics Kft. as a **football data analyst** under my leadership as Managing Director.

I had the opportunity to work closely with Márk for **more than two years**, during which I came to know him as a reliable, motivated professional. He consistently demonstrated a strong **willingness to learn** and develop, both in IT technical and football-related domains.

Márk's **football knowledge is truly outstanding**. He has a deep understanding of the game, including tactical systems, playing styles, and evolving trends. He actively follows contemporary tactical developments on a daily basis and complements this with extensive reading of professional articles and other contents. His knowledge is not limited to modern football but spans several decades, giving him a rare and valuable historical perspective.

At our company, Márk worked as a data analyst, where his responsibilities included defining new performance metrics, **developing prototype analytical models**, delivering client analyses and demos, **writing analytical articles**, and appearing as an expert in podcasts. He speaks **excellent English**, including football-related terms as well.

He possesses strong expertise in advanced performance metrics in football and applies them effectively in his daily work. Márk performs equally well **independently and as part of a team**. He successfully managed clients on his own, demonstrating strong **organizational and planning skills** throughout our collaboration.

We were fully satisfied with Márk's professional performance at our company, and I can confidently **recommend him for any position in football analytics or related fields**.

Please feel free to **contact me** should you require any further information.

Sincerely,

xfb Analytics Kft.
2083 Solymár, Kápolna u. 15.
